*Join the vine and wine
open access movement*

- > 13 institutional members > 21 private partners
- > More than 100 people on its editorial boards
- > More than 70 Open Access publications per year

> The International Viticulture and Enology Society (IVES) is an academic association dedicated to viticulture and enology. Founded in 2017 by a group of leading universities and research institutes, it aims to make the results of scientific research in this field freely available for researchers and professionals.

- > Editor-in-chief vine: Cornelis van Leeuwen, Bordeaux Sciences Agro, France
- > Editor-in-chief wine: Pierre-Louis Teissedre, University of Bordeaux, Institut des Sciences de la Vigne et du Vin, France

> IVES publishes OENO One, a vine and wine online open access peer-reviewed journal. It was founded in 2016, replacing the Journal International des Sciences de la Vigne et du Vin after almost 50 years of existence. It is a peer-reviewed research journal, among the best in the field, and has an exceptional editorial board of highly respected editors and associate editors, covering a broad range of areas in viticulture and enology.

www.oeno-one.eu

[Impact factor 2017-2018 = 0.769 first year]

- > Editor-in-chief vine: Damian Martin, Plant and Food research, New-Zealand
- > Editor-in-chief wine: Marie-Laure Badet Murat, Oenoteam, France

> IVES aims to launch a new journal by the end of 2019: **IVES Technical Reviews** - vine and wine. This journal will be a tool to transfer current research to end users, i.e. consultants, enologists, agronomists, experts, teachers, students, winegrowers, equipment suppliers, and people working in biotechnological and chemical industries. The articles will be sourced from OENO One and other scientific and technical journals. They will be published in English, French, German, Italian, Spanish and Portuguese.

BECOME A PARTNER FOR AN ANNUAL FEE OF 4,500 €/YEAR

Why should my institution become a partner?

- > IVES is supported by 13 leading universities and research institutes in vine and wine sciences and is looking for more partners to increase its network. By joining IVES, your university or institute will become a major actor in open access publishing in viticulture and enology and will contribute to a model of knowledge dissemination in these domains in total independence of private publishers.

This is completely in line with the Open Science movement!

- > By becoming an institutional member, you will contribute to the strategy and development of IVES and its journals, including OENO One, with a right to vote at the General Assembly, which is held yearly. Furthermore, all researchers from your institute or university will be allowed to publish for free in OENO One (researchers from non-affiliated institutes pay 500 €/published article).

Why should my company become a partner?

- > In 2019, we will launch IVES Technical Reviews, a technical journal specially designed to transfer research to end users. Research papers will be digested and published in a format accessible to professionals and reviewed by scientists. IVES Technical Reviews will be edited in six languages (English, French, German, Italian, Spanish and Portuguese). Once a year, we organize an *IVES – OENO One Science meeting* where the staff of our private partners meet researchers and network with other partners. At the meeting, researchers who have recently published in OENO One present their work in an accessible format. It is a unique opportunity to exchange with researchers and colleagues.
