Abstract:

Defined the new paradigm, the applied philosophy, the methodology, the algorithm of the "Charter for Universal Holistic MetaEthic Sustainability 4.1C17.18", research has continued to define and write, an handbook that should be: "Complete Universal Holistic MetaEthics 4.1C of descriptors" of the "Charter for Sustainability Universal Holistic MetaEthic 4.1C17.18" with basic and applicative indexing.

In these activities and research we have involved over 3500 Italian and non-Italian people from the research world to simple but educated, enlightened and enlightening citizens and we have analyzed over 180000 entries concerning the descriptors above, which represent the basic "descriptors".

This innovative revolutionary innovative " Handbook of the Charter of the Universal Holistic Sustainability 4.1C17.18":

1-is particularly important to contribute to have a single basic certification of local sustainability, national, international and this without creating problems to the existing one,

2-fundamental in the application of the original innovative revolutionary " Direct Certification and Direct Warranty of Sustainability" as it puts the producer in condition, among other things:

2.1- to choose from the most universal and complete range of descriptors, which/which descriptors submit to the "Certification and Guarantee Bio-MetaEthics 4.1C",

2.2-of "Communicate 4.1C" to the user of the service (buyer, consumer included) the state of the art of a truly original innovative revolutionary " Direct Certification and Direct Warranty of Holistic Universal MetaEthics Sustainability 4.1C17.18 ",

2.3-to stimulate:

2.3.1-the identification and/or creation of specific qualified and qualifying original descriptors,

2.3.2-the addition to the handbook:

2.3.2.1-in general of descriptors to be certified and guaranteed 4.1C,

2.3.2.2-in particular of specific original descriptors qualified and qualifying for the activity, the company, the brand, the territory and beyond it.

Keywords: sustainability, handbook, certification 4.1C, bio - metaethic sustainability 4.1C

1. Introduction.

Defined the new paradigm, the applied philosophy, the methodology, the algorithm of the "Charter for Universal Holistic MetaEthic Sustainability 4.1C17.18", (Cargnello, 2017, 2018a,b,c,d, Carbonneau and Cargnello, 2018a,b; Cargnello and Carbonneau, 2018a,b,c,d) research has continued to define and write, an handbook that should be: "Complete Universal Holistic MetaEthics 4.1C of descriptors" of the "Charter for Sustainability Universal Holistic MetaEthic 4.1C17.18" with basic and applicative indexing. Therefore, this "Charter for Sustainability Universal Holistic MetaEthic 4.1C17.18" (acronym: "PronCarSOS4.1C17.18") for the "Certification and Guarantee of Holistic Universal MetaEthic Sustainability 4.1C17.18" where everyone, producer, consumer, "International Association BioMetaEtica 4.1C or Bio-MétaÉthique 4.1C or Bio-MetaEthics 4.1C", ... put their face, - (acronyms: "Putting Your Own Face in the Declaration, Certification, Guarantee, ... of Sustainability 4.1C" or "Face Sustainability Guaranteed 4.1C" or "Face Sustainability 4.1C" or "Face SOS4.1C"), - considers and includes material and immaterial descriptors, "physical" and "metaphysical", spiritual and non-spiritual, of believers and non-believers, of atheists, of "atheist believers", of: theologians, philosophers, psychologists, sociologists, moralists, humanists, writers, environmentalists, economists, politicians, administrators, entrepreneurs, technicians, of the "humanae sàpere", "MetaEtici 4.1C", ethical, existential for man and for all the other living beings of the animal and vegetable kingdom, including: mushrooms, protists, and events, as well as existential for the mineral world, landscape, of the diversities, of all the diversities, etc., not anthropized and "anthropized" naturally and/or artificially, before, never seen which, also, go beyond the imaginable, beyond "the earth, the skies, the universes, the multiverses, social employment, environmental, economic, technical. In these activities and research we have involved over 3500 Italian and non-Italian people from the research world (theologians, philosophers, psychologists, sociologists, moralists, humanists, writers, environmentalists, economists, politicians, administrators, entrepreneurs, technicians, ...) to simple, humble but educated, enlightened and enlightening citizens (the "humanae sàpere") and we have analyzed over 180000 entries concerning the descriptors above, which represent the basic or first level "descriptors". After that 1-these aspects progressively have been gradually grouped into "Footprint or Imprint or Ratio 4.1C" to arrive at the 1325 level fifteen descriptors thus grouped:

A.1-basic-2-specific general preparations: 2.1-basic, 2.2-preparatory or preliminary: 2.2.1-optional, 2.2.2-mandatory, 2.3-applicants: 2.3.1-optional, 2.3.2 mandatory, 2.4-operational: 2.4.1-general: 2.4.1.1-optional, 2.4.1.2-obligatory,

B. specific for: 2.4.2.1-viticulture, 2.4.2.2-winery, 2.4.2.3-vitivinicola: wine-growing, wine-growing, wine-growing in their own right or belonging to polyproductive structures and/o cultural, social, educational, informative, and/or polypropitiative parks and/or cultural, social, educational, informative. Then we arrived to the footprint or 4.1C report: 1-technique, 2-economic, 3-environmental, 4-social, 5-existential, 6-ethics, 7-"MetaEthical 4.1C". The work ends with the "Footprint or Report or Overall Imprint 4.1C". 2-1325 technical, economic, environmental, social, existential, ethical descriptors of the fifteenth level, "MetaEtici 4.1C" have been classified into descriptors: "Large", "Medium", "Small", "Smaller but Needed", "Much Smaller or Very Small or Secondary" to which the minimum requirement has been assigned so that this descriptor can be "Bio-MetaEthics Certificate Sustainable 4.1C17.18" or "BME Certificate 4.1C17.18" or "BME 4.1C17.18". In this work we will present this innovative revolutionary innovative " Handbook of the Charter of the Universal Holistic Sustainability 4.1C17.18" which was among other things: 1-is particularly important to contribute to have a single basic certification of local sustainability, national, international and this without creating problems to the existing one, 2-fundamental in the application of the original innovative revolutionary " Direct Certification and Direct Warranty of Sustainability" as it puts the producer in condition, among other things: 2.1- to choose from the most universal and complete range of descriptors, which/which descriptors submit to the "Certification and Guarantee Bio-MetaEthics 4.1C", 2.2-of "Communicate 4.1C" to the user of the service (buyer, consumer included) the state of the art of a truly original innovative revolutionary " Direct Certification and Direct Warranty of Holistic Universal MetaEthics Sustainability 4.1C17.18 ", 2.3-to stimulate: 2.3.1-the identification and/or creation of specific qualified and qualifying original descriptors, 2.3.2-the addition to the handbook: 2.3.2.1-in general of descriptors to be certified and guaranteed 4.1C, 2.3.2.2-in particular of specific original descriptors qualified and qualifying for the activity, the company, the brand, the territory and beyond it.
